Lesson-plan delivery audit

WHAT C1 ACTUALLY RECEIVED, CALL BY CALL

C1 is the condition that adds the lesson plan's design to C0's curriculum objective. One core step is one independent model call, so a key that the plan had nothing for is simply absent from that call's prompt — and once rendered, absent and withheld look the same. This pack reports, per call, which of the six keys arrived and what in the plan explains each miss.

✓ = the key reached this call · — = it did not

t3-w02 · Plane Shapes (2-D Shapes)

Plane shapes: types, properties and perimeter · Third Term, week 2 · 3 core steps = 3 C1 calls · 1 evaluation step

Call	Step	entry behaviour	instructional materials	current step	instructional events	student tasks	assessment points
1	step-t3w02-02	✓	✓	✓	✓	—	✓
2	step-t3w02-03	✓	✓	✓	✓	—	—
3	step-t3w02-04	✓	✓	✓	—	—	✓

Call 1 · step-t3w02-02 — Step II — types of plane shapes, their properties, similarities and differences

lo-t3w02-01: identify the types of plane shapes and state their properties, similarities and differences

student_tasks did not arrive — no block on this step is typed practice (5x explanation), and her Student Activity is 'identify their properties', which is reception.

Call 2 · step-t3w02-03 — Step III — parts of a circle

lo-t3w02-02: identify the parts of a circle

student_tasks did not arrive — no block on this step is typed practice (1x explanation), and the step records no student activity.

assessment_points did not arrive — her evaluation questions name lo-t3w02-01, lo-t3w02-03, not this step's lo-t3w02-02.

Call 3 · step-t3w02-04 — Step IV — perimeter of plane shapes

lo-t3w02-03: find the perimeter of a regular polygon, square, rectangle, trapezium, parallelogram and circle

instructional_events did not arrive — the step records no teacher or student activity, so there is nothing to code.

student_tasks did not arrive — no block on this step is typed practice (1x explanation, 10x worked_example), and the step records no student activity.
