Lesson-plan delivery audit

WHAT C1 ACTUALLY RECEIVED, CALL BY CALL

C1 is the condition that adds the lesson plan's design to C0's curriculum objective. One core step is one independent model call, so a key that the plan had nothing for is simply absent from that call's prompt — and once rendered, absent and withheld look the same. This pack reports, per call, which of the six keys arrived and what in the plan explains each miss.

✓ = the key reached this call · — = it did not

t3-w06 · Construction

Construction: parallel and perpendicular lines, bisection, and angles 90 and 60 degrees · Third Term, week 6 · 5 core steps = 5 C1 calls · 0 evaluation steps

Call	Step	entry behaviour	instructional materials	current step	instructional events	student tasks	assessment points
1	step-t3w06-02	✓	✓	✓	✓	✓	—
2	step-t3w06-03	✓	✓	✓	✓	—	—
3	step-t3w06-04	✓	✓	✓	✓	✓	—
4	step-t3w06-05	✓	✓	✓	✓	✓	—
5	step-t3w06-06	✓	✓	✓	✓	✓	—

Call 1 · step-t3w06-02 — Step 2 — parallel lines

lo-t3w06-01: construct parallel lines

assessment_points did not arrive — the lesson has no evaluation step at all.

Task-shaped lines in her note for this step, and what the note does next. Decide each against the source page: only the page says whether she set it.

> (a) Place a set square so that one edge is accuratly along AB

followed by “fig-01. Line AB, with a point P marked above it. A set square is drawn below AB with one edge along the line: the right angle is at the left end of th...” — the drawing of this stage follows — a construction performed

☐ work she set ☐ work she demonstrated ☐ not a task

> (b) Place a ruler along one of the other edge of the set square. Use the left hand edge if you are right handed.

followed by “fig-02. The same set square on AB, with the ruler now drawn as a long strip lying along the set square's downward edge. The set square's vertical edge...” — the drawing of this stage follows — a construction performed

☐ work she set ☐ work she demonstrated ☐ not a task

Call 2 · step-t3w06-03 — Step 3 — perpendicular lines

lo-t3w06-02: construct perpendicular lines

student_tasks did not arrive — no block on this step is typed practice (1x explanation), and the step records no student activity.

assessment_points did not arrive — the lesson has no evaluation step at all.

Task-shaped lines in her note for this step, and what the note does next. Decide each against the source page: only the page says whether she set it.

> 1. Draw a line AB mark a point Q on the line.

followed by "fig-07. A plain line with a stroke at each end, labelled A on the left and B on the right. The point Q named in the instruction is not marked on the d..." — the drawing of this stage follows — a construction performed

☐ work she set ☐ work she demonstrated ☐ not a task

> 2. Place the edge of the set square on line AB. Let the edge of the ruler meet the hypotenuse of the set square as shown.

followed by "fig-08. Line AB with the set square standing on it as a narrow right-angled triangle: a short base along AB, a near-vertical edge rising from the righ..." — the drawing of this stage follows — a construction performed

☐ work she set ☐ work she demonstrated ☐ not a task

Call 3 · step-t3w06-04 — Step 4 — construction of line segments

lo-t3w06-03: bisect a given line segment

assessment_points did not arrive — the lesson has no evaluation step at all.

Task-shaped lines in her note for this step, and what the note does next. Decide each against the source page: only the page says whether she set it.

> 3. Place the sharp point of the compass on A, Draw two arcs, one above and the other below the midle of AB.

followed by "fig-11. The segment AB with arc pairs crossing above and below it, the upper crossing labelled P and the lower one Q. Each crossing is drawn as a smal..." — the drawing of this stage follows — a construction performed

☐ work she set ☐ work she demonstrated ☐ not a task

Call 4 · step-t3w06-05 — Step 5 — angle 90°

lo-t3w06-04: construct angle 90°

assessment_points did not arrive — the lesson has no evaluation step at all.

Task-shaped lines in her note for this step, and what the note does next. Decide each against the source page: only the page says whether she set it.

> 1. Draw a line segment AB and mark a point O on it where the right angle is to stand.
> 2. With centre O and any convenient radius, draw an arc to cut AB at X and Y.
> 3. With centre X and a radius greater than XO, draw an arc above AB.
> 4. With centre Y and the same radius as in (3), draw an arc to cut the first arc at Z.
> 5. Join OZ. Then ∠ZOA = ∠ZOB = 90°.

followed by "fig-13. The line AB with a stroke at each end, the two arc cuts X and Y marked either side of the middle, and the perpendicular OZ erected from O betw..." — the drawing of this stage follows — a construction performed

☐ work she set ☐ work she demonstrated ☐ not a task

Call 5 · step-t3w06-06 — Step 6 — angle 60°

lo-t3w06-05: construct angle 60°

assessment_points did not arrive — the lesson has no evaluation step at all.

Task-shaped lines in her note for this step, and what the note does next. Decide each against the source page: only the page says whether she set it.

> 1. Draw a line segment BC with centre B at any convinent radius. Draw an arc to cut BC at X
> 2. with centre X and the same radius as in (i) draw an arc to cut the first arc at A
> 3. Join AB.

followed by "fig-14. The line BC with B at the left, a stroke marking X part way along, a long arc swung from B through X and up to the left, a shorter arc swung f..." — the drawing of this stage follows — a construction performed

☐ work she set ☐ work she demonstrated ☐ not a task
