Lesson-plan delivery audit

WHAT C1 ACTUALLY RECEIVED, CALL BY CALL

C1 is the condition that adds the lesson plan's design to C0's curriculum objective. One core step is one independent model call, so a key that the plan had nothing for is simply absent from that call's prompt — and once rendered, absent and withheld look the same. This pack reports, per call, which of the six keys arrived and what in the plan explains each miss.

✓ = the key reached this call · — = it did not

t3-w09 · Need for statistic

Need for statistics: purposes, and the collection and tabulation of data · Third Term, week 9 · 2 core steps = 2 C1 calls · 1 evaluation step

Call	Step	entry behaviour	instructional materials	current step	instructional events	student tasks	assessment points
1	step-t3w09-02	✓	✓	✓	✓	—	✓
2	step-t3w09-03	✓	✓	✓	—	—	✓

Call 1 · step-t3w09-02 — Step 2 — the purpose and meaning of statistics

lo-t3w09-01: explain the purpose of statistic

student_tasks did not arrive — no block on this step is typed practice (2x explanation), and the step records no student activity.

Call 2 · step-t3w09-03 — Step 3 — collecting, tallying and tabulating data

lo-t3w09-02: analyse and interpret statistical data presented in tables

instructional_events did not arrive — the step records no teacher or student activity, so there is nothing to code.

student_tasks did not arrive — no block on this step is typed practice (3x explanation), and the step records no student activity.
